

Incorporation control

The image shows a close-up of a green printed circuit board (PCB) with a silver component mounted on it. A white multi-pin connector is connected to the board. Several colored wires (black, yellow, red, blue) are plugged into another connector. The PCB has various components like capacitors and resistors, and is labeled with 'MCB071' and '194V-0c91'. A red line points from the 'Incorporation control' label to the white connector.

BLACK - GND ground

YELLOW - PPM impulses

RED - U power supply +
