

Power Ion Tx 5800 battery pack

Power-Ion 5800 battery pack is designed to power JETI model transmitters of the DC and DS lines. The battery is equipped with plugs. Charging is done via the transmitter and the adapter that comes with the transmitter.

The operating time of the DC and DS transmitters is extended up to 20 hours between recharges.

Battery replacement:

- Make sure that the transmitter is turned off.
- Remove the back cover of the transmitter.
- Disconnect the original battery, loosen the Velcro.
- Replace the battery, secure it with the Velcro.
- Connect the battery to the transmitter using the connector.
- Reinstall the back cover of the transmitter.

| Type of set | Nominal capacity | Nominal/ maximum voltage | Weight of the set | Dimensions |
|---------------------------|------------------|--------------------------|-------------------|------------|
| Power Ion Tx 5800 1S2P | 5800mAh | 3.6V/4.2V | 100g | 75x37x20mm |

Attention:

- do not put the cells in fire, respect the maximum operating temperature of +60°C
- do not penetrate the metal case – the temperature of the cell may then increase and irritant gas may appear
